

## EDUCATION

---

### New York University(NYU), New York

New York, NY

*B.A. Chemistry; Minors in Math and Computer Science; GPA: 3.7*

*Aug. 2013 – May. 2017*

## EXPERIENCE

---

### Queens Village Medical Center

Queens Village, New York

*Day Operations Manager*

*May 2017 - Present*

- Analyze, examine and compile financial records to visualize business expenditures and potential areas of growth
- Delegate tasks to assistants to fill out, send and verify prescription orders; manage 4 employees
- Hire and train physician assistants to perform spirometry, EKG and other health examination procedures

### Private Academic Tutor

New York, New York

*Tutor for Chemistry, Computer Science, Math, & Physics*

*Sept 2014 - April 2018*

- Worked with high school and undergraduate students to improve comprehension and academic performance in calculus, data structures, organic and inorganic chemistry, and general physics
- Reviewed homework assignments and examination questions to focus necessary areas for improvement
- Prepared customized lesson plans and problem sets according to student difficulty areas and tracked growth

### NYU

New York, New York

*Research Assistant*

*July 2014 - August 2014*

- Assisted with research on unusual DNA structures for potential nanotechnology integration
- Purified and extracted DNA strands required for analysis
- Analyzed synthetic DNA structures using X-ray crystallography and molecular modeling software

## PROJECTS

---

- **Markov Text Generator:** Developed a Markov Text Generator, whose objective was to take text from a user input and generate different Markov order texts- multi-char, one, two, up to n-word order approaches. Used hashmaps for storing keys of follow words, which greatly improved time-complexity.
- **Earthquake Map Visualizer with GUI:** Developed an app for gathering and parsing earthquake data from the USGS.gov database and to display them on a map using Google Maps API, with added mouse functionality for improving UX.
- **To-Do List Web Application:** Built a To-Do list web application using React, HTML and CSS, using JSONPlaceholder to simulate a back-end server for storing entries.

## ACHIEVEMENTS AND RESPONSIBILITIES

---

- **Sophomore Cohort President:** Elected by a individual cohort of sixty students to organize and host small-scale events for our cohort. Managed a \$3400 budget to be spent on small-scale cohort events, achieving an increase in class attendance from the previous year. Additionally, collaborated with the Class Activities Board to organize and host class-wide events for sixteen-hundred students.
- **University Honors Scholar/Founders' Day Award:** Baccalaureate candidates that obtained a cumulative GPA that places them within the top 40 percent of their school's graduating class.

## TECHNICAL SKILLS

---

**Proficient:** Java, Python, Data Structures and Algorithms

**Comfortable:** C#, HTML/CSS, React
